

Land Surveying on the Meridian and Perpendicular System

Filesize: 5.64 MB

Reviews

Very beneficial to all category of folks. We have study and that i am sure that i will planning to go through yet again again in the future. Its been printed in an extremely straightforward way in fact it is just soon after i finished reading this pdf where actually changed me, alter the way i really believe.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .from this point is + 10 in order to bring the observed bearing A. to the standard. Thus the observing of the bearings goes on in the same routine, always choosing for the standard bearing in each case the one which has emanated most directly from the first standard of the survey. For example, in fixing upon the standard at the point D., the bearing D.A. should be preferred in place of D.C. or D.B., because D.A. = 310 23 55, was the outcome of the first setting, viz. that of A., and is therefore manifestly more reliable than any of the others. This principle should be applied in all angular observations throughout the survey, either in triangulation or traverse. The observations having been completed from all the Trig stations, the surveyor now proceeds to compute the angles. This may be done by constructing a rough sketch of the whole triangulation, and marking thereon the observed bearings as corrected in their proper positions. Fig. 21 may be taken as an example. It now becomes a simple matter of subtraction to arrive at the angles, thus the angle C.A.B. = 69 34 07 --14 26 45 = 55 07 22 as observed. Again, the angle F.A.C. = 360 00 00 --313 02 37 +14 26 45 = 61 24 08. The difference between this case and the former one arises because the meridian line lies within the angle; the simpler method is to add 360 to 14...
